Transderm Scōp®, pronounced tran(t)s-derm skōp (scopolamine) transdermal system patch

Tell your doctor about all the medicines you take, including prescription and non-prescription medicines, vitamins and herbal supplements. Transderm Scōp® may affect the way other medicines work, and other medicines may affect how Transderm Scōp® works. Medicines that you take by mouth may not be absorbed well while you use Transderm Scōp®. Especially tell your doctor if you take:
- a sedative or tranquilizer (medicines that make you sleepy)
- an antidepressant medicine
- an anticholinergic medicine, such as an allergy or cold medicine, a medicine to treat bladder or bowel spasms, certain asthma medicines, or other medicines for motion sickness.

Apply Transderm Scōp® as follows:
Inside the Transderm Scōp® package, you will find one Transderm Scōp® patch. A tan-colored patch with a metallic (silver) sticky surface is adhered to a clear disposable backing (See Figure 1).

1. Select a hairless area of skin behind one of your ears. Avoid areas on your skin that may have cuts, pain or tenderness. Wipe the area of your skin with a clean, dry tissue.

2. Cut along dotted line on the Transderm Scōp® package to open (See Figure 2).

3. Remove the clear plastic backing from the tan-colored round patch (See Figure 3).

4. Avoid touching the metallic adhesive (sticky) surface on the patch with your hands (See Figure 4).

5. Apply the metallic adhesive surface of the patch firmly to the dry area of skin behind your ear. The tan-colored side of the patch should be facing up and showing (See Figure 5). Wash your hands with soap and water right away after applying the patch, so that any
If you use too much Transderm Scōp®, call your doctor or local poison control center, or go to the nearest hospital emergency room right away.

What should I avoid while using Transderm Scōp®?
- You should not drink alcohol while using Transderm Scōp®. It can increase your chances of having serious side effects.
- You should not drive, operate heavy machinery, or do other dangerous activities until you know how Transderm Scōp® affects you.
- You should not use Transderm Scōp® during a Magnetic Resonance Imaging scan (MRI). Remove Transderm Scōp® patch before undergoing an MRI; it can cause your skin to burn.
- You should be careful if you use Transderm Scōp® while you participate in watersports because you may feel lost or confused (disoriented).
- Limit contact with water while swimming and bathing because the Transderm Scōp® patch may fall off. If the patch falls off, throw it away and apply a new one on the hairless area behind your other ear.

What are the possible side effects of Transderm Scōp®?
Transderm Scōp® may cause serious side effects, including:
- angle closure glaucoma. If you have open angle glaucoma and use Transderm Scōp®, remove the patch and call a doctor right away if you get pain and reddening of your eyes with an increase in the size of your pupil (the small dark circle in the eye).
- temporary increase in the size of your pupil and blurry vision, especially if Transderm Scōp® comes in contact with your eyes
- difficulties in urinating
- difficulties in food passing from the stomach to the small intestines, which may cause abdominal pain, nausea or vomiting.
- worsening of seizures. Tell your doctor about any worsening of seizures while using Transderm Scōp®.
- an unusual reaction called acute psychosis: Tell your doctor if you have any of these symptoms:
  - confusion
  - agitation
  - rambling speech
  - hallucinations (seeing or hearing things that are not there)
  - paranoid behaviors and delusions (false belief in something)
- skin burns at the site of the patch. This can happen during a medical test called a Magnetic Resonance Imaging scan (MRI). Transderm Scōp® contains aluminum and should be removed from your skin before you have an MRI.

The most common side effects of using Transderm Scōp® include:
- dry mouth
- drowsiness
- disorientation (confusion)
- blurred vision
- pharyngitis
- memory trouble
- dizziness
- restlessness
- agitation
- problems urinating
- skin rashes or redness, application site burning
- dry itchy, or reddened whites of the eyes, and eye pain

Symptoms when removing Transderm Scōp®. Some people may have certain symptoms 24 hours or more after removing Transderm Scōp®. These symptoms may include:
- dizziness
- nausea
- vomiting
- headache
- problems with balance and walking
- decrease in blood pressure
- muscle weakness
- decrease in heart rate

Tell your doctor if you have any side effect that bothers you or that does not go away. These are not all the possible side effects of Transderm Scōp®. For more information, ask your doctor or pharmacist.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

How should I store Transderm Scōp®?
- Store Transderm Scōp® at room temperature between 68°F and 77°F (20°C and 25°C) until you are ready to use it.
- Keep Transderm Scōp® and all medicines out of reach of children.

General Information about Transderm Scōp®
Medicines are sometimes prescribed for purposes other than those listed in a patient information leaflet. Do not use Transderm Scōp® for a condition for which it was not prescribed. Do not give Transderm Scōp® to other people, even if they have the same symptoms you have. It may harm them.

This patient information leaflet summarizes the most important information about Transderm Scōp®. If you would like more information, talk with your doctor. You can ask your pharmacist or doctor for information about Transderm Scōp® that is written for the health professionals.
